

# 3 TIPS TO HELP YOU RAPIDLY RECOVER YOUR DATA WITH HPE AND VEEAM

## MAKE THE TRANSITION FROM LEGACY INFRASTRUCTURE

Data-driven companies face a constant battle against cyberthreats and downtime, which makes data protection a top priority for IT organizations. Legacy infrastructure can put data at risk and hold the business back from unleashing its full potential.

## FOLLOW THESE EXPERT TIPS

In today's digital economy, IT organizations need solutions that deliver more than on-prem backup and recovery. You must protect business applications in hybrid cloud environments, prevent data loss, and prepare your business to get backup and running fast after any incident.

Modern data protection solutions can simplify your infrastructure, protect your data, and help you recover data and apps quickly. Choose a solution that allows you to:

01

**Simplify your IT environment**

Choose a data protection solution is simple to deploy and manage, unlocking agility in your infrastructure.

02

**Protect your data**

Deploy a proven solution from trusted partners.

03

**Recover data and apps quickly**

Make sure the solution lets you rapidly recover data at the most granular level.

These briefs, technical papers, and videos can help you take the next steps.
